Oppression of the half of Humanity by the other leads the world to its fall .
Passivity towards the increasing of religious fundamentalisms and « traditional » customs implies a multiplication of attempts against fundamental human women's rights. The violence of these attempts is often murderous

Aisha Ibrahim Duhulow., a Somali woman, found guilty of adultery by an Islamic court has been buried alive until the neck and stoned till death by 50 men , on Monday in the town of Kismayo (south of Somalia). This town is under the control of Islamists since the 22d of august and submitted to the most adamant Charia law since this day .

European Feminist Initiative calls the feminists , all the democrats women and men , activists for human rights , opposed to the death punishment , to the torture , to the cruel and degrading treatments, to unite to make their revolt heard as well as their refusal of murders , mutilations, rapes, persecutions suffered by millions of women on behalf of religion , of honour, of culture, of traditions.

We call for the creation of a wide movement to claim, promote and preserve secularism as a protective and necessary dam to preserve women's rights , women's physical and psychological integrity and security

We call for united delegations towards Somalia embassies all over Europe, to express our refusal of barbarism and of all the fundamentalisms and to ask them to transmit our deep indignation to the authorities of their country. We shall appeal to the European and international Human Rights Institutions to get their explicit condemnation of such barbarous acts, because the torturers have a name .
